INTRODUCTION

The following numbered *American Museum Novitates* listed alphabetically by author(s) cover all 422 articles on fossil and recent amphibians and nonavian reptiles published in this series. Junior author(s) are referenced to the senior author. All articles with original (new) scientific names are preceded by an * (asterisk). The first herpetological publication in this series is dated 1921 (by G. K. Noble).

All articles (fossil and recent) published through the year 1999 are listed. All scientific names are listed alphabetically and referenced to the numbered article(s) they appear in. All original spellings are maintained. Subgenera (if any) are treated as genera. Names ending in **i** or **ii**, if both are used, are given with **ii**. All original names are ***boldfaced italicized***.

The author wishes to thank C. Gans for originally suggesting these projects and G. R. Zug and W. R. Heyer for suggesting the scientific name indexes. C. J. Cole supplied some articles and other information.
